Tic-Tac-Toe game

The program will display the game board and also shows player who is in turn ("X" or "O"). Players should be able to start a new game in a new window, and close the old window. When a player wins, notify the user in a pop-up window. In case of exit, ask for confirmation.

Multi-window Tic-Tac-Toe

Modify the previous solution, so the game can be played on a 3x3, 4x4, or 5x5 sized board. Create a main program from which you can start a new game in the size of your choice. Any number of games can be played in parallel. When exiting the main program, also ask for confirmation and close all game windows.
